PROFILE

Computer Science graduate (2024) with a strong offensive security track record on HackTheBox — India Rank #86, Season 10 global top 745, and Holo Tier winner. Specialises in Active Directory attack chains, lateral movement, and AD Certificate Services exploitation. Seeking an entry-level red team or VAPT role where deep hands-on lab experience translates directly to client engagements.

PROJECTS & LABS

HTB Mini Pro Lab: Mythical

HackTheBox — Multi-stage Enterprise AD Environment

Completed

- Completed full attack chain: recon → initial access → lateral movement → privilege escalation → domain takeover
- Exploited MSSQL abuse, AD Certificate Services (ESC attacks), DCSync, and cross-domain forest trust attacks
- Operated a C2 framework throughout to simulate real adversary tradecraft

Pass-the-Hash

Active Directory Attack Lab (In Progress)

Personal — VMware, Two-Domain Forest

2024 – Present

- Building a two-domain forest with intentional misconfigurations to practice and document real-world attack paths
- Covers Kerberoasting, AS-REP roasting, ACL abuse, Pass-the-Hash, and lateral movement scenarios

VMware

BloodHound

Impacket

NetExec

SharpHound

HackTheBox Machine Writeups (10 Published)

5 × AD | 3 × Windows Hard | 2 × Linux Medium

- Documented full attack chains with methodology, tooling, and remediation context
- AD writeups cover Kerberoasting, AS-REP roasting, ACL abuse, cross-domain exploitation, and DCSync

EDUCATION

Bachelor of Engineering — Computer Science

Ajeenkya DY Patil School of Engineering, Pune

June 2024
